## SPIDER ARMOR ZJ-802

The design inspiration comes from spiders! It is a new development with cool appearance of the bionic mech spider, eight cantilevered spider-like legs, each of which is available for 3 riders.

Spider Armor can be an eye-catching star ride for indoor or outdoor parks.

## SCORPION ARMOR ZJ-803

Scorpion Armor ZJ-803 has a very cool and novel appearance! Its vehicles run on the central platform, each cantilever has 4 rotation axes; there are four rotatable platforms at the end of the cantilever, and each disc can seat 6 riders.

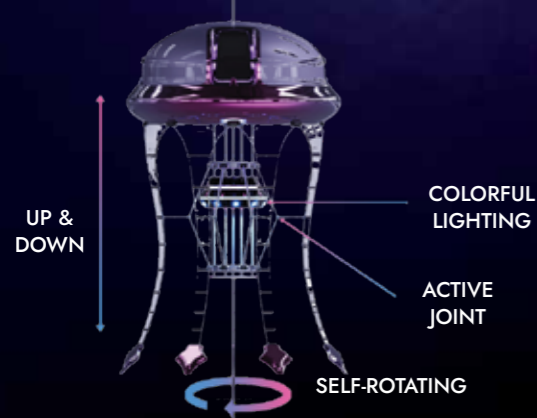

With its novel design, Scorpion Armor can be a great choice for outdoor and indoor parks.

## JELLYFISH ARMOR ZJ-804

Jellyfish Magic Armor is a self-rotating tower ride with a cool futuristic mech jellyfish appearance. When the seats rotate up and down, it is accompanied by magic lights and movable joints of the body, creating a futuristic sci-fi feeling.

Loved by both kids and adults, Jellyfish Armor makes your parks different and unique!

## CRAB ARMOR ZJ-805

A giant crab! We developed the Crab Armor ZJ-805 from the inspiration of crab! It has the cool appearance of bionic mech giant pliers. It runs by the rotation of the platform on the top of the ride, each cantilever has 2 rotation axes, and 8 people can be seated at the end.

The ride has a novel appearance and rich dynamic operating elements, making it an eye-catching star attraction in the park.
